

## Teacher-Child Rating Scale 2.1 (T-CRS)

Teacher completed measure of children's social-emotional adjustment

### Short

Only 32 items

### Reliable

Alpha reliabilities range from .87–.94

### Valid

Highly correlated with similar scales from the Achenbach Teacher Report Form

### Four Constructs:

- (1) Task orientation
- (2) Behavior control/aggressive
- (3) Assertiveness/shy or withdrawn
- (4) Peer social skills

### Possibilities for Use:

- Assessment of children's socio-emotional strengths
- Measurement of social-emotional adjustment
- Pre/post measure of behavior change
- Component of psycho-educational assessment for special education
- Screening for programs
- Evaluation of programs aimed to improve children's adjustment

---

*"You'd be hard pressed to find a better all-around combination of reliability, low cost, accurate measurement of important things, policy-friendliness and ease of use – which is maybe the major consideration for our teacher corps. In short, in the measurement of social and emotional constructs, the Teacher-Child Rating Scale simply has no equal."*

–Andrew MacGowan  
Administrator,  
Rochester City School District
