If you know a child who appears to be experiencing challenges, Primary Project may be the solution.

This one-to-one time with a caring role model is even more important now as we help students process their world through play.

Primary Project is a nationally recognized program that helps children in pre-K through third grade adjust to their environment, gain confidence, social skills, and focus on learning. Primary Project has over 60 years of success addressing children’s mild to moderate adjustment difficulties and increasing their chance of success. It can be implemented in schools and in person, or virtually, including in home-based learning environments.

SCREENING

Early social-emotional development screening with a standardized tool will be critical to understanding student’s needs and help to support decisions regarding which students are best served by Primary Project.

RELATIONSHIPS

Positive relationships are critical to school success! In Primary Project, children are paired with a specially trained professional.

SHORT TERM

Children are seen weekly for 30-40 minutes for 12-15 sessions of play.
